

PRODUCT DATA SHEET

JE PISTONS ARCTIC CAT WILD CAT 1000i PERFORMANCE PISTONS

JE Pistons' performance pistons for UTVs are engineered, forged, and machined in-house in the USA using 2618-T6 aluminum alloy. JE's UTV piston kits provide a range of engine build options, from gaining more reliable performance to standing strong in high-performance scenarios such as boosted and high-compression builds.

WILD CAT PISTON FEATURES

- **2618 Alloy** – Forged and heat-treated 2618 aluminum alloy provides substantial tensile strength to withstand the stresses of high-performance engines and provide superior longevity
- **Forged Side Relief** – Designed and manufactured with a dedicated forged side relief (FSR) style forging to maintain strength while reducing weight and operating friction
- **Compression Ratio Options** – Available in compression ratios ranging from 8.5:1 to 12.5:1, accommodating everything from turbo to high-compression builds
- **Standard and Overbore** – Bore size options include OEM and 2mm oversize, each in various CR options to tailor specifically to your engine build
- **Accumulator Groove** – Help improve ring seal and prevent ring flutter
- **Piston Kit** – Each kit includes all necessary pistons, wrist pins, rings, and locks under one part number
